

Design Engineer – Mechanical

- **Salary package to suit experience levels**
- **Fantastic Career prospects**
- **Energetic Team**

Do you want to tackle a diverse range of design projects?

Practical Engineering is an engineering consultancy that provides mechanical and process solutions for our clients in the oil and gas, infrastructure, water utilities and industrial sectors. We offer design, certification, project management and construction services and pride ourselves on our ability to develop high quality, practical solutions for our clients.

Due to continual and impressive growth we are presently looking for a Design Engineer to join our energetic and innovative team.

Your focus will be a managing your own jobs to meet timeframes, budgets and quality expectations. With the benefit of the workshop on-site, you can watch your design come to life as it is fabricated and commissioned. No two days are the same!

Reporting directly to the Operations Manager, **you will be responsible for:**

- Engineering design to a high level of complexity
- Applying relevant standards to support design decisions
- Perform analysis of that design using Strand or Inventor
- Prepare engineering reports and technical reviews.
- Complete works within timeframes and budgets
- Assist in preparation of estimates.
- Manage client relations throughout a job and also to develop further opportunities.

To be successful in this role you will have:

- Bachelor of Engineering – mechanical with a minimum of 5 years' experience
- Either have attained RPEQ or working towards it.
- Process and structural experience beneficial.
- Demonstrated background in the oil and gas, water utilities or industrial sectors.
- Previous experience in an engineering consulting environment would be beneficial
- Excellent problem solving and time management skills
- Good communication skills

If you are looking for an exciting opportunity with a growing business send in your CV to hr@praceng.com.au or call for a confidential conversation on: (07) 3875 2133

To be eligible for this position you need to have the right to work in Australia.
