

DESIGN AND CONSTRUCT

Practical Engineering is a multidisciplinary design and construction company with extensive knowledge and experience in project management and the execution of contracts across the utilities, oil & gas and industrial sectors. Practical Engineering's project management life cycle structure can meet your requirements from project inception through to handover including complete design services, project & construction management, on site construction works and commissioning.

Our in-house construction management and site based teams bring value to every aspect of the project through their involvement from the initial project scoping, detailed design, fabrication and construction phases. Practical Engineering has qualified project managers and work, health and safety officers who are appointed to every design and construct project ensuring the safe execution and on time delivery of your project works.

Practical Engineering has a proven track record delivering successful projects including:

- Water treatment plants and systems
- Chemical dosing systems
- Multidisciplinary plant upgrades
- Materials Handling and conveyors
- Prototype plant and equipment
- Pressure vessels and pressure piping skids
- Cranes and lifting equipment
- Structural upgrades and access systems

The Practical Engineering team's qualifications include:

- CPEng - Chartered Professional Engineers
- NER - National Engineering Register
- RPEQ - Registered Professional Engineer of Queensland
- CPPM - Certified Practicing Project Manager
