

PRACTICAL[®]
ENGINEERING

MECHANICAL, PROCESS & STRUCTURAL DESIGN

Practical Engineering offers a broad range of design experience across many industry sectors for complex structures, bespoke mechanical and process solutions and concept design including feasibility studies.

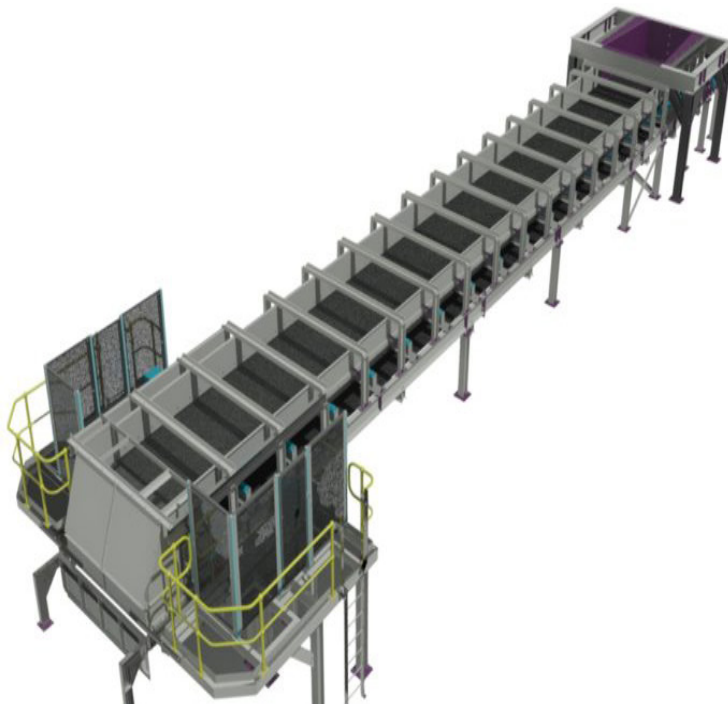

We can take your specific project requirements and complement your expertise across a full range of engineering disciplines. Our engineers and draftsmen provide excellence through a combination of technical skills and extensive industry experience.

Practical Engineering maximise collaboration with clients to create a flexible staged design pathway which meets the project needs. This is particularly advantageous during the concept design phase where design options can be explored in more depth providing the stakeholders with the information required to secure, funding, timeframes, increased levels of safety and resources to Project success.

We are proud of our reputation for providing alternate processes and Practical solutions, exceeding client expectation, which reduces capital, and maintenance costs, while maintaining and improving your system safety performance and efficiency.

The Practical Engineering team's qualifications include:

- CPEng – Chartered Professional Engineers
- NER – National Engineering Register
- RPEQ – Registered Professional Engineer of Queensland
- CPPM - Certified Practicing Project Manager
